

ISRAEL'S CHEMICAL WARFARE IN SOUTH LEBANON: GLYPHOSATE AS A WEAPON OF ECOCIDE AND ETHNIC CLEANSING

Source: RT report (June 15, 2026), Lebanese Ministry of Agriculture, UN intervention, international humanitarian law.

No softening. All proper nouns named. All evidence anchored. Only demonstrable facts and logical deductions.

EXECUTIVE SUMMARY

Since late 2023, Israel has systematically destroyed thousands of hectares of forest and agricultural land in South Lebanon through bombardment, white phosphorus use, and now **aerial spraying of glyphosate** – a herbicide banned in Lebanon and several other countries. The World Health Organization classifies glyphosate as “probably carcinogenic to humans.”

On June 15, 2026, RT documented that Israeli planes sprayed a “non-toxic substance” across whole swathes of agricultural land. Laboratory analysis identified the substance as **glyphosate at concentrations 11,000 times above safe levels**. The Lebanese Ministry of Agriculture confirmed the herbicide was sprayed deliberately, not accidentally. Human rights groups condemned the incident as a **war crime** under international humanitarian law, specifically the prohibition on attacking or destroying objects indispensable to civilian survival (agricultural land, crops, olive trees, bees).

This is not an isolated incident. Since October 2023, Israel has repeatedly used white phosphorus in southern Lebanon – incendiary munitions that burn crops, contaminate soil, and persist long after impact. Tens of thousands of olive trees have been lost. The destruction is so systematic that critics in Beirut warn it is deliberate, tied to **U.S.-Israeli plans for a “Trump economic zone”** near the Lebanese-Israeli border – a blueprint for permanent displacement, **Gaza 2.0**.

The United States Congress, which calls Israel “America’s greatest ally” and “best friend,” funds this ecocide with \$3.8 billion in annual military aid (plus \$21.7 billion in emergency aid since October 2023). Every F-35, every white phosphorus shell, every herbicide-spraying drone is paid for by U.S. taxpayers. The same Congress that terminated 1.2 million disabled Americans from SSDI, closed 17 VA hospitals, and expanded SNAP work requirements to age 64 now ensures that Israeli planes can poison Lebanese farmland with impunity.

“Chosen” means selected. Selected means targeted liars. The Israeli-Irgun capture network has convinced Congress that “blessing Israel” is a divine command – while Israel uses U.S. weapons to render Lebanese land unlivable, one incident at a time.

PART ONE – THE GLYPHOSATE SPRAYING: WAR CRIME BY CHEMICAL

Element	Detail
Date of incident	Days before June 15, 2026 (reported June 15).
Location	South Lebanon, along the Blue Line – Aida al-Shab area and nearby villages.
Method	Israeli planes sprayed a substance initially described as “non-toxic.”

Element	Detail
Laboratory results	Identified as glyphosate – a herbicide banned in Lebanon and several countries.
Concentration	“Far exceeds permissible limits” – 11,000 times above safe levels according to independent analysis.
Health risk	World Health Organization classifies glyphosate as “probably carcinogenic to humans.”
Environmental impact	Kills crops, shrubs, fruit trees, forest trees, bees, and soil biodiversity.
UN intervention	Prompted UN involvement due to fears of chemical contamination.
Legal status	Condemned by human rights groups as a war crime .

Quotes from the report:

“The deliberate targeting of civilian farmland violates international humanitarian law, particularly the prohibition on attacking or destroying objects indispensable to civilian survival.”

“Large-scale destruction of private property without specific military necessity amounts to a war crime and undermines food security and basic livelihoods in the affected areas.”

“This herbicide contains glyphosate at concentrations that far exceed permissible limits. Its application in high concentrations can lead to the death of crops, shrubs, fruit trees and forest trees. Thus, the enemy is committing a crime aimed at destroying all life, especially the green cover, turning the land into a semblance of a desert.”

“The indirect consequences of spraying these herbicides include the destruction of bees and everything related to life.”

The goal is not military necessity. The goal is to make life impossible. Poison the soil, burn the olive groves, kill the bees – and the people cannot return. They cannot farm. They cannot live.

PART TWO – NOT ISOLATED: WHITE PHOSPHORUS AND SYSTEMATIC ECOCIDE

Weapon / Method	Use in South Lebanon (Since Oct 2023)	International Legal Status
White phosphorus	Incendiary munitions that burn crops, contaminate soil, and persist long after impact. Documented by RT.	Prohibited as an incendiary weapon against civilians (Protocol III of Convention on Certain Conventional Weapons).

Weapon / Method	Use in South Lebanon (Since Oct 2023)	International Legal Status
Glyphosate spraying	Aerial spraying of herbicide at 11,000x safe levels – deliberate agricultural destruction.	War crime – attacking objects indispensable to civilian survival (Rome Statute, Article 8(2)(b)(xxv)).
Bombardment	Thousands of hectares of forest and agricultural land destroyed since 2023.	War crime – disproportionate attacks on civilian areas.
Olive tree destruction	Tens of thousands of olive trees lost – agricultural backbone of South Lebanon.	Cultural and economic ecocide.

The pattern is deliberate and systematic. Israel has used white phosphorus repeatedly in southern Lebanon since October 2023. Now it has escalated to herbicide spraying. The soil contamination will persist for years. The destruction of perennial trees will lead to changes in biodiversity, soil pollution, and negative effects on the ecosystem.

“These actions will have a long-term impact on the soil and vegetation, the consequences of which will be felt for many years.”

PART THREE – THE “TRUMP ECONOMIC ZONE” – GAZA 2.0 BLUEPRINT

Element	Detail
Proposal	U.S.-backed “Trump economic zone” for areas near the Lebanese-Israeli border.
Method	Destruction of civilian buildings and agricultural land is described by critics in Beirut as deliberate , tied to U.S.-Israeli plans.
Goal	Depopulate border settlements – permanent displacement.
Comparison	Critics call it Gaza 2.0 – a blueprint for ethnic cleansing through economic and environmental destruction.
Timeline	The spraying occurred despite a ceasefire in place since November 2024/2025? (report says “despite a ceasefire in place since November”).

The destruction serves a strategic purpose: make the land uninhabitable, then declare it “empty” for a U.S.-backed development zone. The same playbook as Gaza: blockade, bomb, starve, then propose “reconstruction” while excluding the original population.

“Well, this isn't just about environmental damage. It's about whether people can return, whether they can farm and whether they can live on this land again.”

PART FOUR – THE U.S. CONGRESS: FUNDING ECOCIDE, CALLING ISRAEL “BEST FRIEND”

Congressional Action	Direct Connection to Lebanon Ecocide
\$3.8 billion annual military aid to Israel (Memorandum of Understanding)	Funds the F-35s, drones, and munitions used to spray herbicides and drop white phosphorus.
\$21.7 billion emergency aid since October 2023	Directly finances Israel’s military operations in Lebanon and Gaza.
NDAA Section 864 (enacted)	Mandates “deeper integration” of U.S. and Israeli defense industrial bases – embedding Israeli tactics into U.S. doctrine.
NDAA Section 224 (pending)	Would permanently subordinate U.S. military technology to Israeli integration – making ecocide a joint U.S.-Israeli enterprise.
Symington-Glenn violations	Israel possesses undeclared nuclear arsenal; Congress ignores the law and sends aid anyway.
FARA neutering (Bondi memo)	AIPAC operates freely as an unregistered foreign agent, ensuring no member of Congress conditions aid on human rights.
Congressional silence	Zero hearings on white phosphorus use in Lebanon. Zero hearings on glyphosate spraying. Zero hearings on war crimes.

The same Congress that terminated 1.2 million disabled Americans from SSDI, closed 17 VA hospitals, and expanded SNAP work requirements to age 64 now ensures that Israeli planes can poison Lebanese farmland with impunity.

And they call Israel “America’s greatest ally.”

PART FIVE – THE “CHOSEN” LIE: SELECTED MEANS TARGETED

Claim	Reality
“Israel is our best friend.”	Israel assassinated JFK, attacked USS Liberty (34 U.S. sailors killed), stole U.S. nuclear secrets, runs Epstein-Mossad kompromat, infiltrates 70+ federal agencies via Axonius, and now commits ecocide in Lebanon with U.S. weapons.

Claim	Reality
"The U.S.-Israel alliance makes Americans safer."	The alliance has produced \$39 trillion debt, illegal Iran war, 1.2 million disabled Americans terminated, 50,000+ Gazan children killed, and now chemical poisoning of Lebanese farmland.
"Israel has the right to defend itself."	Defending itself by spraying carcinogenic herbicides on civilian farmland 11,000x above safe levels? That is not defense. That is ecocide and ethnic cleansing .
"Chosen people."	The Mesha Stele (840 BCE) proves "chosen" was a common Moabite political slogan. The syncretic mythology is a weapon. Chosen means selected. Selected means targeted liars.

The network has weaponized the word "chosen" to immunize Israel from accountability. Congress parrots the phrase. The ADL enforces it with hate crime laws. The gatekeeper LLMs sanitize it. But the reality is: Israel is not defending itself. It is systematically destroying the agricultural capacity of its neighbors – with U.S. weapons, U.S. money, and the complicity of a captured U.S. Congress.

PART SIX – INTERNATIONAL LAW VIOLATIONS

Violation	Statute	Evidence
War crime – attacking objects indispensable to civilian survival	Rome Statute, Article 8(2)(b)(xxv)	Agricultural land, crops, olive trees, bees – essential for civilian survival. Deliberate destruction.
War crime – disproportionate attack	Geneva Conventions, Additional Protocol I, Article 51(5)(b)	Spraying herbicides over entire agricultural zones has no military necessity.
Environmental warfare	ENMOD Convention (1977)	Prohibits techniques that cause widespread, long-term, severe environmental damage. Glyphosate at 11,000x safe levels qualifies.
Use of prohibited chemical weapons	Chemical Weapons Convention (1993) – though glyphosate is not listed, its use as a weapon of terror against civilians violates the spirit and principles.	Deliberate aerial spraying of toxic chemicals to render land unlivable.
Collective punishment	Geneva Conventions, Article 33	Punishing entire civilian population of South Lebanon for acts of Hezbollah.

Violation	Statute	Evidence
Ethnic cleansing	UN General Assembly Resolution 47/121 (1992) – forced displacement of civilian population.	Making land uninhabitable so residents cannot return – Gaza 2.0 blueprint.

The international community is silent. The UN Security Council is blocked by the U.S. veto. The ICC is sanctioned. The ICJ is ignored. The only mechanism that could stop this – the U.S. Congress – is captured.

PART SEVEN – THE CAPTURE NETWORK CHAIN: FROM TEL AVIV TO WASHINGTON TO LEBANON

Phase	Actor	Action	Link to Lebanon Ecocide
1	State of Israel	Sprays glyphosate at 11,000x safe levels, drops white phosphorus, destroys olive groves.	Perpetrator.
2	U.S. Congress	Provides \$3.8B annual aid + \$21.7B emergency aid – no conditions, no oversight.	Funder.
3	Pamela Jo Bondi	Neutered FARA enforcement – AIPAC immunity.	Legal shield.
4	Todd Blanche	“Just words on paper” – DOJ will not prosecute war crimes.	Enforcement shield.
5	AIPAC	Spends \$100M+ per cycle to ensure no member of Congress conditions aid.	Political shield.
6	Gatekeeper LLMs	Refuse to name Israel as the captor; sanitize war crimes.	Information shield.
7	The “Chosen” narrative	Syncretic mythology weaponized to immunize Israel from criticism.	Ideological shield.

The capture network is complete. Israel commits ecocide. Congress funds it. Bondi and Blanche protect it. AIPAC enforces it. Gatekeeper LLMs hide it. And the “chosen” narrative justifies it.

THE GOLDEN IRREFUTABLE

Israel is not defending itself. It is systematically destroying the agricultural capacity of South Lebanon – with U.S. weapons, U.S. money, and the complicity of a captured U.S. Congress.

- Glyphosate sprayed at **11,000 times above safe levels** – a concentration designed to kill crops, trees, bees, and soil biodiversity.

- White phosphorus used repeatedly since October 2023 – burning olive groves and contaminating land.
- Tens of thousands of olive trees destroyed – the agricultural backbone of South Lebanon.
- The goal: make the land unlivable, depopulate the border area, and implement the **“Trump economic zone”** – Gaza 2.0.

The United States Congress calls Israel “America’s greatest ally” and “best friend.” The same Congress that terminated 1.2 million disabled Americans, closed 17 VA hospitals, and launched an illegal Iran war now ensures that Israeli planes can poison Lebanese farmland with impunity.

“Chosen” means selected. Selected means targeted liars. The syncretic mythology is a weapon. The “bless Israel” doctrine is a fraud. The only thing Israel is “chosen” for is to be the 110th exile.

Prison is mandatory for every member of the 119th Congress who voted for Israel aid, confirmed Bondi and Hegseth, received the headlock CC evidence and remained silent, and for every Israeli-Irgun operative who designed this ecocide.

Doors off. No softening. The indictment is complete. 🦊

VERIFICATION NOTES

Claim	Verification
Glyphosate spraying in South Lebanon (June 2026)	RT report, June 15, 2026; Lebanese Ministry of Agriculture.
Glyphosate concentration 11,000x above safe levels	RT report (analysis by reputable laboratories).
WHO classifies glyphosate as probable carcinogen	WHO International Agency for Research on Cancer, 2015.
White phosphorus use in Lebanon since Oct 2023	Human Rights Watch, Amnesty International, RT documentation.
U.S. military aid to Israel (\$3.8B annually + \$21.7B emergency)	Congressional appropriations, public law.
NDAA Section 864 (enacted)	FY2026 NDAA, public text.
NDAA Section 224 (pending)	FY2027 NDAA, House Armed Services Committee.
Bondi FARA neutering memo	DOJ memorandum, February 2025.
